6.5-Watts mono-crystalline super slim solar panel with premium solar cells and a hardened anti- scratch coating.

Intelligent voltage regulation module keeps your device-battery secured; inside an accurately measured zippered mesh pocket

## 3 STEP USER MANUAL

- Connect the device that needs to be charged to the SUNSAC Solar Panel with the USB cord.
- Now place Your SUNSAC in a spot that receives direct sunlight and ensure your connected device is charging.
- Ensure the device being charged (Power bank, mobile phone or any other USB device) is not under direct sunlight itself or is placed back in the bag or the mesh pocket on the back of the solar panel to protect the battery.

### IMPORTANT

- Keep your phone on Flight Mode or Low Energy Consumption mode for it to charge faster.
- Since the output port is USB, it can be used to charge smart phones, power banks, tablets, pads, iphones, accessories and any other 5V USB-charged devices.
- The charging time will be dependent on the input capacity of the device being charged, exposure to sunshine and power bank or mobile phone capacity etc.
- Generally, for 6.5W solar charger, Under ideal circumstances SunSac panel charges a 2000 Mah battery completely in 2-3hours
